- Network troubleshooting
- Troubleshooting skills
- DevOps principles
- Cloud computing
- Infrastructure as Code
- Load balancing
- AWS expertise
- Kubernetes management
- Cloud automation
- Monitoring tools
- Serverless computing
- CI/CD Pipeline
- GitOps
- Bash scripting

PROFILE

Cloud computing specialist with strong background in designing, deploying, and managing cloud infrastructure. Skilled in AWS, Azure, and Google Cloud, with focus on automation, scalability, and security. Known for fostering collaborative team environments and adapting to evolving project needs to drive results. Respected for reliability and strategic problem-solving abilities. Experienced with cloud architecture and system integration, ensuring seamless cloud operations. Utilizes automation tools to maximize efficiency and security. Track record of managing cloud resources to optimize performance and reduce costs.

WORK EXPERIENCE

Unifycx - **Mangalore, India**   2024 AUGUST - 2025 NOVEMBER
Junior Support Engineer

- WordPress issues, including plugin/theme conflicts, broken layouts, PHP/MySQL errors, and core update failures.
- Provided front-end and back-end troubleshooting, ensuring cross-browser and mobile compatibility.
- Optimized website performance by implementing caching, database clean up, image optimization, and CDN integration.
- Handled malware removal, SSL issues, and applied WordPress security best practices to protect sites from vulnerabilities.
- Restored and migrated WordPress websites across different hosting environments with minimal downtime
